FINANCIAL POLICY

We believe in the importance of quality dental care and always strive to provide the best treatment possible. Also, we understand the financial limitations that influence your choice of care. We want to assure you of our flexible approach to financing. We work with most insurance companies and always try to maximize your coverage through meticulous detailing of procedures and interaction with your insurer. We even submit all your claims for you and are available to answer any questions we can.

Payment and Scheduling:

Please remember that if you are using insurance, you are responsible for the portion not covered by your plan. **Because we, too, must balance our finances, we do ask that you pay your portion in full before beginning treatment.** For minor work such as fillings, your patient portion is required at the time of scheduling your appointment. For major services, we ask that 50% of your portion is paid at scheduling to reserve your treatment time, and the remaining balance is due at your appointment before the procedure begins. Or, if it works better for you, you may use CareCredit (medical-only financing) for any services, which will allow you to make monthly payments with no money down. For your convenience, we also accept major credit cards and personal checks (\$25 fee for returned checks). In the event that your insurance denies your claim, you will be financially responsible for all completed treatment. An account 3 months past due will be transferred to recovery, and a \$25 billing charge will be assessed at that time.

Cancellations and Rescheduling:

We understand that rescheduling or cancelling your appointment sometimes becomes unavoidable. We do ask that you provide at least 48 hours notice. **Please note there is a \$50 per hour fee for late reschedules, cancellations, or no-show appointments.**

We hope that you find this information useful. Rest assured that we are here to help make high quality dental care obtainable to all. We look forward to working with you to achieve excellent dental health!

Sincerely,

Jesse C. Engle, DMD
